CLARION™

AUGMENTING THE VALUE OF DIAGNOSTIC DATA

CN

**OPTIMIZE DIAGNOSTICS.
OPTIMIZE THERAPY.**
With our **complete solution**
for **antimicrobial stewardship.**

PIONEERING DIAGNOSTICS

CLARION™

Analytics for Diagnostic Stewardship

Managing data in the lab can be time-consuming, and the process is often challenged by increasing demands and decreasing resources. With CLARION™, healthcare organizations can uncover actionable insights to support infectious disease management, antimicrobial stewardship (AMS) initiatives, and lab performance optimization.

Support Infectious Disease Management

Monitor trends in organisms occurrence and resistance patterns to support informed therapy decisions:

- Provide cumulative antibiograms in one click to help facilitate annual guidelines updates and enhance the accuracy of empiric therapy
- Monitor yearly susceptibility trends and MDRO susceptibility profiles
- Track emerging antimicrobial resistance (AMR), monitor and track MDRO trends
- Monitor circulation of respiratory viruses, respiratory pathogen geomapping and details

Optimize Quality Results

Identify sample quality and ineffective collection practices for:

- Blood culture: with blood culture stewardship set of dashboards (contamination, volume, load time, collector insights, time to result, and more)
- Urines: with urine contamination dashboard

Drive Lab Performance

Optimize microbiology lab workflow and time-to-results by analyzing and monitoring:

- Turnaround time analysis and benchmarking
- Rapid staining of positive blood cultures
- VITEK® MS spotting performance and workload
- Monitoring test volumes and positivity rates

Simplify IT with CLARION™ Cloud-Based Informatics

User-Friendly Interface

Focus on your core business and expertise

Accessibility and Flexibility

Access your data from anywhere and collaborate with colleagues

Advanced Interoperability

Integrate seamlessly with existing systems for a unified data view

Cloud-Based Architecture

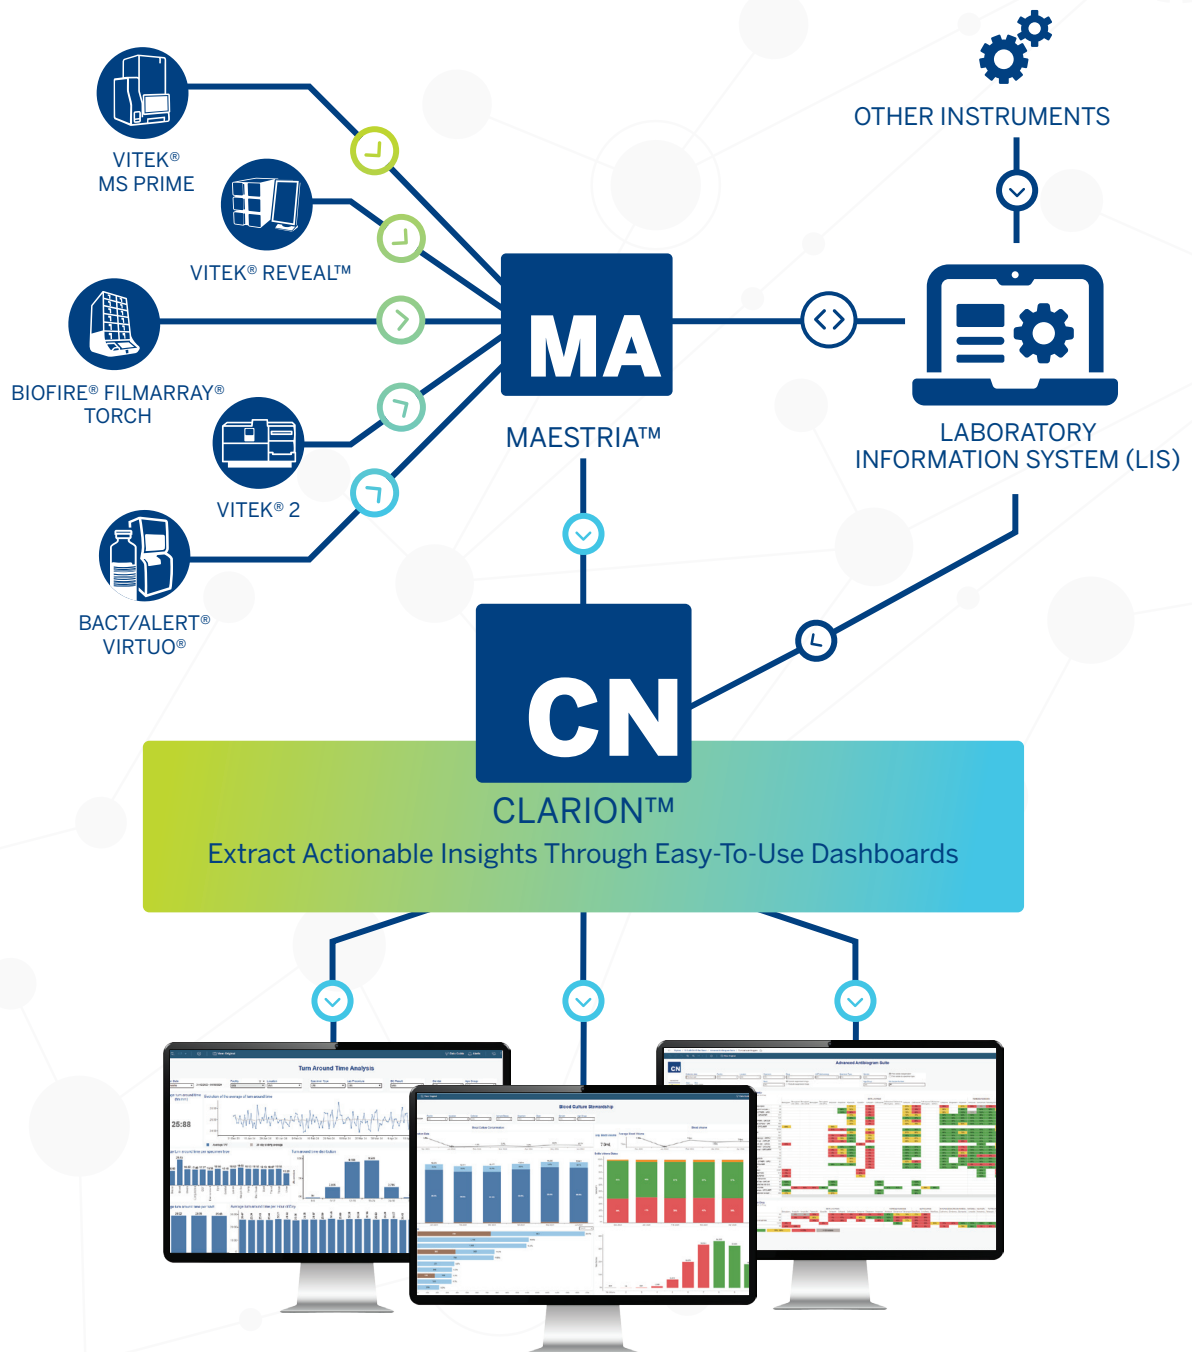

Deploy, maintain, and scale with ease

Robust Security Measures

Ensure data security and compliance with industry standards

Leverage the power of CLARION™ with seamless communication from instruments to MAESTRIA™ middleware and LIS.

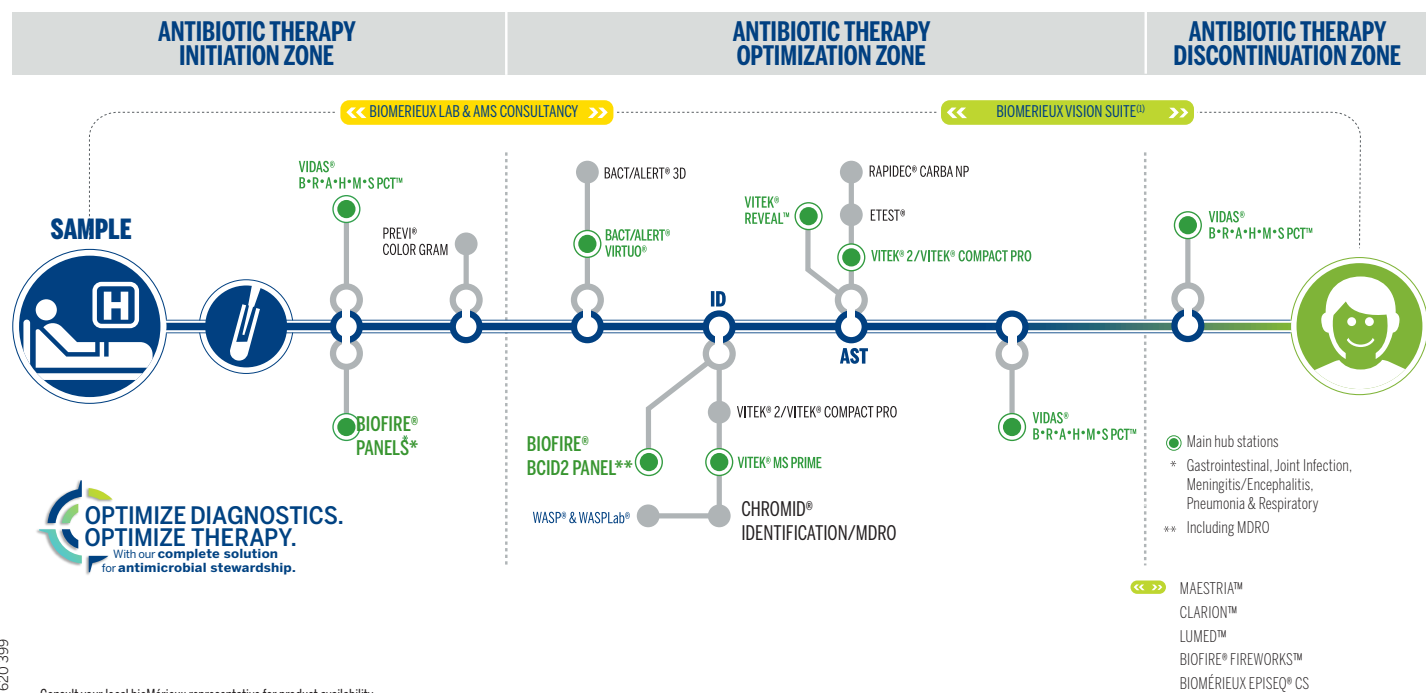

Multi-Facility Functionality

Consolidating data and providing analytics for organizations with multiple locations and facilities.

A Software Solution that Reinforces our Antimicrobial Stewardship Offer

CLARION™ addresses stakeholder groups from the laboratory to AMS and infection prevention control (IPC) committees and teams with actionable insights based on consolidated data.

DISCOVER BIOMÉRIEUX VISION SUITE

Data-Driven Decision Making

BIOMÉRIEUX VISION SUITE turns laboratory and hospital data into insightful, actionable information to support diagnostic and clinical decisions at all stages to better support antimicrobial stewardship.

By providing a comprehensive suite of software solutions that collect, analyze, and merge various sources of data, BIOMÉRIEUX VISION SUITE empowers you to make the right decisions at the right time.
